The impact and impact of Trump's election on the Communist Party of China and overseas pink - Temple of Literature - World Wide Blog - World Wide Reader Network (computer version)

Four years later, Trump, who was not re-elected in the 2020 presidential election, was re-elected as the 47th President of the United States in November 2024. The United States has completely changed! If based on reason, common sense and simple objective analysis alone, his re-entry into the White House and the Republican Party's majority victory in both houses (the House of Representatives has not been finalized) is in line with common sense, and it should have been an election without too much suspense. Because the historical mistakes of Trump's opponents' rule have bored the people, not many law-abiding people like to enter the border casually, "zero-yuan purchase" and other policies that violate traditional and civilized values. Most people hate the logical chaos itself. People who rely on political correctness only hate him too much and the distorted reports of the media, which has the dramatic effect of the ups and downs of the election.

After my only debate before the general election, I wrote the article "The weaknesses and lifelines of Trump and He Jinli's first fight", pointing out that He Jinli failed to bring out her political views and logical facts to win the voters' continued support for the re-election of the Democratic Party. On the two weak issues of price inflation and illegal immigration at the economic level, He Jinli repeatedly dodged and avoided the focus, and most of the time she would only attack her opponents. However, the

opponent has been eaten by most people, and a slight careless attack will only attract disgust. Ordinary Americans are very practical, and the number of people who are really bound by beautiful slogans should be limited, so her defeat is not surprising, and the result is more or less reflecting the maturity and rationality of American voters. The bullet that hit Trump and his fearless spirit of fighting have foreshadowed a brief victory or re-election.

Under the operation of the light and dark media at home and abroad, all kinds of information are flying all over the sky before the election. In fact, the U.S. election is the world election. There are many people who care, but people at home and abroad who are not familiar with American politics, culture and social issues are often misled and overwhelmed, and sometimes appear hysterical and enter a state of extreme thinking. As long as it is not maliciously manipulated by the government of a hostile country, individual freedom of speech is the bottom line of American political life. Unlike those conspiracy theories, my judgment on the presidential election in the past eight years is generally the same, that is, no one who is elected can fundamentally shake the national capital of the United States. In the era of AI, the evolution and development of society is different from the past. The election has become extremely intense, and the truth is becoming more and more hidden and complicated. However, as long as there is a heart to explore, any lie may be revealed in the end.

First of all, many people are convinced that Trump likes dictatorship and will be dictatorship, and I have always been skeptical about these statements. First of all, the separation of powers in the United States, the independent government of multiple levels (federal, states, counties and cities), the rule of law and the supervision of public opinion make it impossible to rule dictatorship in the modern sense. Trump likes dictatorship at most because of the expansion of other people's weaknesses, and it is just the boss in the business field. As a president

with only a four-year term, he needs determination and will, rather than a steady framer. Secondly, some people predict that if He Jinli is elected, the United States will be at the end of the world, fearing that it will become a socialist or communist country. Of course, this is also close to nonsense, which beautifies the essence and connotation of an authoritarian dictatorship. Finally, the so-called "Let America be great again", that is, MAGA, just listen to it. Don't take the election strategy too much. The greatness of America lies in God's blessing and mercy. The role of individuals is limited, and no one can completely change the will of God.

Most rational voters hope that the political party government will have healthy competition and frequent rotation, so as to correct mistakes, uncover past scars, and move forward with a democratic and transparent civilized system. There are many outstanding issues, such as the truth of the origin of the plague virus, whether there is large-scale election fraud in 2020, etc. The unsolved problem is the root cause of social division. The two parties alternately rule, providing an opportunity to solve these suspicious cases. The failure of the ruling Democratic Party will naturally spur it to reflect, improve and reorganize, and work hard for the next turnaround.

The propaganda during the election period gave the impression that Trump would change the political staly and constitution after he was elected. For example, some people claim to eliminate the Democratic Party and the so-called extreme leftist forces. Trump and his team have neither this ability nor this intention, but there is no doubt that they will take some policy measures to restore the practice of conservative forces. As for the propaganda of hostile governments, ignore it. After the 2020 general election, these gangsters were afraid that the United States would not be chaotic, so they incited bipartisan confrontation and riots, such as making Chinese videos such as "Pig Girl" and creating sensational fake news every day. Judging from the content, there must

be a strong operation team supporting it. After a while of tossing and turning, it did not play any role in front of the mature American society and the people. Instead, it exposed the true face of some anti-communist Internet people. Finally, Zhu Mei had to quietly leave.

After Trump returns to the White House, the international political map will definitely change. With the help of many advisers, he will also learn from the lessons of alienating allies after his first election and continue to maintain Biden's international cooperation blueprint. His position on Israel and the Middle East will not change. The war against terrorist organizations in the Middle East will not stop. This is the only way to ensure Israel's security.

In international affairs, the relationship between the United States and Russia will face a new test. The Russia-Ukraine war has been going on for nearly three years, dragging Russia and the gold owners who supported it. There is no doubt that the Communist Party of China is a world-recognized Middle East terrorist organization and the black hand in promoting the Russia-Ukraine war. Many people hate Pukin and Russia. They don't want Russia to split tomorrow, and the United States will become the only one. Is it cool? However, the nationality of this country cannot be ignored, which corners people. What's more, it is also a nuclear power with a vast geographical background, which is not something that people with strategic vision should do. Both the Communist Party of China and the West can see that if the United States makes the Middle East and Eastern Europe peaceful, all the "big game of chess" will collapse, which is indeed a "surging" news for the Communist Party of China.

The question is back to the topic. The impact and impact of Trump's election on the Communist Party of China should not be underestimated. Many overseas Chinese and people who grew up in the city are not very clear about the inferiority of traditional Chinese. As a person who had

experience living in rural areas at the end of the Cultural Revolution, I know their cultural characteristics very well. Don't expect politeness, reason, harmony, assistance or even saving lives, which will be respected by the "compatriots". The only language that can make them kneel down and convince them or understand is fists and whips, plus some beautiful false slogans. The Communist Party of China started from Mao, that is, it was familiar with the game. Of course, this is the product of China's thousands of years of feudal system. The national characteristics above do not include all people with conscience. Please pay attention to distinguish.

The Communist Party of China is currently in power in China, so it is called the Communist Party of China, but the Communist Party of China is not exactly the same as the Chinese. Only the storms can save the Chinese people. Of course, it is the Communist Party of China that has been subverted. The separation of the two is a painful and gradual process. The process is repeated, and bloodshed and sacrifice are inevitable. This is also the fate of the Chinese people who have called for "revolution" for more than a hundred years. Xi Jinping, the leader of the Communist Party of China, is a typical picture of the above-mentioned villagers. Trump's reappearance may also be good news for the Chinese. Let's wait and see.

On the Taiwan Strait issue, some people have rumored that Trump will give up Taiwan. Please don't forget that eight years ago in 2016, Trump called Tsai Ing-wen after his first election. Please see my analysis at that time: the article "Chuan Ye flirts with Xiaoying, the collapse of Chinese Sichuan fans". I have to say that when Trump ran for the first time, the Communist Party of China mobilized almost milk-eating forces to praise Sichuan, thinking that businessmen would benefit from it without values, but it turned out that he took the wrong medicine, just like the current embarrassing situation on the issue of Russia, Ukraine and the Middle East.

Finally, let's talk about advice to overseas Chinese or American Chinese. During Trump's first term, I wrote articles such as "Why Should I Betray the Party?", "Restricting the Entry of Party Members and the Sichuan Black Phenomenon of Chinese" and "The Fate of Communist Party Members (with Survival Guide)". Many people have begun to converge under high pressure, but in the past four years, there have been signs of rising. Please take a look at Trump's pre-election speech. He said that I announced today: a new plan to protect the integrity of our immigration system. Federal law will prohibit communists and totalitarians from entering the United States! We will also pass a new law to deal with such people who grew up here! Therefore, we will prevent communists, Marxists and socialists who hate Christianity from entering the United States, and we will prevent them from leaving the United States.

Chinese snobbery or eating with both heads is something engraved in the bones. Although it is also a commonality of human beings, thousands of years of life-seeking principles have made these corruptions carried forward, and the characteristics are very obvious. Many people are not wrong, but have no principles of life at all. Will the Trump authorities liquidate this garbage? Let's wait and see.

During the campaign, both Trump and the Republican Party put forward many promises or beautiful slogans. Both supporters and opponents and all citizens have the obligation and right to continue to supervise and criticize the governance of the next ruling team. The United States will continue to be great only if the basic principles given by the Constitution, such as the rule of law, fairness and justice, and freedom of speech, will the United States continue to be great. May God bless this country.
